From: Delta Constructors
Re: Scams and Fraudulent Purchase Orders

To whom it may concern,

Delta Constructors, LLC encourages all vendors to contact Delta Constructors, LLC at info@deltacollectors.net or (907) 771-5800 to verify orders that seem suspicious. All suppliers must be vigilant and protect themselves against fraud.

Scammers are targeting businesses across the United States claiming to be placing orders on behalf of Delta Constructors, LLC. We encourage all suppliers to take precautions so that the supplier does not become a victim of these scams. The scams have historically involved fraudulent/fake purchase orders, fake requests for quotations, and credit card orders for custom built equipment that claim to originate from Delta Constructors, LLC, but are fraudulent.

Please also be aware these scammers will use legitimate Delta Constructors, LLC physical/shipping addresses when placing the order.

In some cases, a scammer may spoof a Delta Constructors, LLC email. Always check the email's headers to determine if the email originated from a deltacollectors.net domain account. There are resources and training materials available online to learn how to spot a spoofed email. Even if the order appears to come from a legitimate Delta Constructors, LLC email, we recommend suppliers remain vigilant and contact Delta Constructors, LLC directly to verify the request. If the order is unusually large or if your company has not done business with Delta Constructors, LLC before, you can contact us and we can help determine whether the purchase is legitimate.

Suppliers are fully responsible for verifying the accuracy of all orders. Delta Constructors, LLC is not responsible for any losses caused by suppliers filling fraudulent orders. If you have a question about whether a purchase order or request for quotation is valid, or if you would like to report a fraudulent order, please forward the appropriate information to info@deltacollectors.net.
